Thanks Doug;
The coordinated submittal is one of the challenges that we have been dealing with. I am glad to see that it was picked up as an issue. The call in info is:
The meet me conference # is: 844-637-3111
5 digit code 84287
Followed by 123456

Call my cell if you have any problems 631-258-3725.

Thanks again

Pete,

Here are my comments in track changes. As a general over I have never work with private sites so I admit I don't know how they work among themselves to get a coordinated submittal.

Does each of the 3 separate plumes have to submit the various documents or does one document have to be submitted with the PDI and RD etc for each plume?

Also for FF only one Site Management Plan (SMP) is submitted but here it seems that one is requested for various items and I was wondering if it was referring to more of a project schedule and not a SMP.

Also I never saw it stated as to how EPA approves of anything... is it in writing? Can it be verbal? Who has to give it? Etc.

Any let me know if you have any questions and what the call-in number is for Monday.

Doug/Mark/Sherrel;

Attached is the draft sow and UAO for the remedial design of the OU1 groundwater remedy at the New Cassel site. The plan would be for you to review the SOW so that we could have a conference call on Monday to discuss. Doug, you will be playing the role of the consultant representing the relevant respondents for the eastern plume. Mark, you will represent the central plume. Sherrel, you will represent the western plume. Also attached is the order that contains the definitions. Please do not review the order, just refer to the order for the definitions (you may have comments on the definitions).

I will send out a separate invite for a conference call on Monday to discuss your thoughts on the sow and we will also have specific questions to ask you. Please let me know if you have any questions about the instructions we previously discussed. I appreciate everyone finding the time to be part of this group. Thanks and looking forward to having a good discussion on Monday.
